INTERNSHIP

AI & Cloud Intern — Hebbale Academy (HAWCC Platform) *Jun 2025 – Sep 2025*

- Built multi-agent AI systems using Agentic AI frameworks as part of a cross-functional team.
- Developed serverless cloud functions with AWS Lambda, S3, and DynamoDB to power real-time application features.
- Integrated CWI components into intelligent applications as part of a production-bound AI platform.
- Member of the winning team, Agentic AI Hackathon 2025, for the HAWCC platform submission.

PROJECTS

CSA-DEPT-PRO — React, Node.js, MongoDB, Firebase, Cloudinary

- Built a full-stack department management system with alumni management, audit logging, and role-based access control.
- Designed MongoDB schemas with Mongoose validation and fixed data-integrity issues in production audit logs.
- Deployed the frontend on Firebase Hosting and the backend on Render, with image handling via Cloudinary.

Reclaim-It — React, Node.js, Tailwind CSS, Firebase

- Built a lost-and-found platform with user flows for reporting and searching missing items.
- Integrated Firebase Authentication and Firestore to enable authenticated posting and real-time match notifications.

Portfolio Platform — React, Node.js, Express, MongoDB, JWT

- Built a full-stack personal portfolio with a private admin dashboard for managing projects, skills, and messages.
- Implemented JWT-based authentication with protected API routes secured through Express middleware.
- Deployed the frontend on Vercel and backend on Render, using MongoDB Atlas as the cloud database.
